For Immediate Release

July 7, 2014

Notice of 2014 Street Maintenance to be conducted in Dunes City

Dunes City, Oregon –Patch and repair maintenance will be performed on some of Dunes City’s streets during the month of July. The affected streets are Laguna Avenue, Leanza Drive and Osprey Way. Preparatory work is expected to begin the week of July 7, 2014. That work will consist of repair and replacement of designated sections on various streets. This work is necessary for our streets to be maintained properly and to insure the maximum life possible of the existing asphalt. This maintenance should have minimal to no affect on vehicular traffic and access to homes while the work is being completed

Our contractor for this work is Johnson Rock Products of Coos Bay.

At the owner’s expense, Johnson Rock is willing to replace or repair an existing driveway within the Dunes City limits. A quote can be obtained by calling Kortney Johnson at Johnson Rock at 541-269-2000.

Actual dates and time schedules of work to be performed on each street will be forthcoming. To stay informed on the project, call or email Linda Stevens at admin@dunescityor.com or call 541-997-3338.
